PROFESSIONAL EXPERIENCE

2nd page:
Job description

PESSOAS 2030 // FINANCIAL AND DATA ANALYST IN EU FUNDS

Company: State Organization - PESSOAS 2030 - Program of Portugal 2030.
Function: Financial Analyst and data analyst in projects under the Demography, Qualifications and Inclusion Program co-financed by the European Social Fund (ESF).

jan 2023 - present

COSCO SHIPPING CO // MARITIME EXPORT PROCESS MANAGER

Company: Euroatla as Shipping Agent for COSCO Shipping Company
Function: Managing and monitoring the process of exporting goods by land and sea

aug 2021 - aug 2022

GRUPO ETE // PROJECT MANAGEMENT IN MARITIME SECTOR

Company: Grupo ETE in ETE-SGPS, SA
Function: Management, planning and development of new projects and businesses in the maritime sector

oct 2019 - aug 2021

MSC SHIPPING CO // ASSISTANT MARITIME EXPORT PROCESS MANAGER

Company: MSC - Mediterranean Shipping Company
Function: Managing and monitoring the maritime export process

abr 2019 - oct 2019

EDUCATION

POSTGRADUATE // GEOSPATIAL DATA SCIENCE

University: NOVA IMS - Information Management School

The postgraduate course in **Geographic Information Systems (GIS)** focused essentially on the analysis, modeling and visualization of geographic using data advanced geoprocessing tools, in **ArcGIS Pro**, with the aim of mapping georeferenced information. In addition, it also explored knowledge of **Cartography**, **Remote Sensing**, **Spatial Statistics**, **Spatial Databases**, as well as, computing environments such as Programming (**Python and SQL**), and the application of **predictive models** with Data Mining, through KNIME, aimed at processing geospatial data.

sep 2023 - jun 2024

Github: Projects

MASTER'S DEGREE // URBANISM AND SPATIAL PLANNING

University: IGOT - Institute of Geography and Spatial Planning

fev 2018 - jun 2018

MASTER THESIS // BAÍA DO TEJO

Topic: The construction of the future Lisbon Container Terminal in Barreiro
Goals: To ascertain potential impacts on the Environmental, Economic, Social and Urban aspects.

Consult in: <https://repositorio.ul.pt/handle/10451/37320>

ano 2018

SCIENTIFIC POSTER // URBAN CLIMATE

Topic: The influence of albedo on vehicles in the urban environment
Project exhibition at the 10th International Urban Climate Conference in New York

Consult in: https://www.researchgate.net/publication/327107660_Cool_and_Hot_Cars_the_Impact_of_Vehicles_Albedo_in_Urban_Environment

sep 2016 - feb 2019

DEGREE // MANAGEMENT

University: ISCTE - Iscte Business School

jul 2016

SUMMER INTERNSHIP // ACCENTURE

Department: Management Consulting

feb 2016 - jun 2016

ERASMUS + // BRATISLAVA, ESLOVÁQUIA

University: University of Economics in Bratislava

sep 2013 - jun 2016

ADDITIONAL TRAINING

POWER BI

Company: Trinity Intelligence
Course: "Por dentro do Power BI", Hotmart
Tools: Power BI, DAX & Power Query

nov 2022

MAIN OBJECTIVE

I am currently seeking opportunities as a professional opportunity as a **Junior** in the field of **Geographic Information Systems**, **Geospatial Data Analysis** or **Cartography**.

Recently completed a postgraduate degree in Geospatial Data Science and I intend to **direct my career towards Geographic Information Systems**, which is the area I am most passionate about and to which I want to be deeply dedicated.

My intention is to contribute as a Data Analyst using **advanced geoprocessing tools (in ArcGIS Pro)**, programming languages, and other GIS techniques, like remote sensing, to develop **map visualizations**, **reports**, and **detailed analyses**

ABOUT ME

I love geography. It's a science that is present in almost every aspect of our lives. We live in a geographical space where everything can be georeferenced, and we are deeply influenced by our environment. GIS captivates me for its power to map, analyze, and interpret geographical data, helping us better understand the world around us.

CURRENTLY

I work as a financial analyst and I also work in data analysis, focusing on the production of analytical files in Excel and the creation of reports and dashboards in Power BI.

TOOLS

Softwares:

ArcGIS Pro, Excel (VBA), Power BI (DAX, M)

Programming languages:

SQL and Python (I have some knowledge, but I'm not proficient)

COMUNICATION

Portuguese ★★★★★
English ★★★★★
Spanish ★★★★★

RITA SEIXAS

CURRICULUM VITAE

JOB DESCRIPTION

POSTGRADUATE

NOVA IMS - Geospatial Data Science

Subjects:

1. Spatial Data Analysis & Visualization
2. GIS Modeling
3. Geographic Information Science & Systems
4. Spatial Statistics
5. Geospatial Programming
6. Cartographic Sciences & Data Acquisition
7. Spatial Databases
8. Remote Sensing
9. Data Mining

Softwares:

1. **Arcgis pro:** Geoprocessing tools for spatial analysis, Spatial modeling - Weighted Overlay, Network Analysis, ModelBuilder, Topology, Interpolation, Spatial Statistics, Classification and analysis of satellite images.
2. **SQL:** SQL in Microsoft Access DBMS and its implementation in a Geodatabase in ArcGis Pro.
3. **Python:** Python with Arcpy in ArcGIS Pro, using visual code.
4. **Knime:** data mining tool and machine learning models in visual form, without the need for code.

MASTER THESIS

IGOT: Urbanism and spatial Planning

Topic: "Construction of the future Lisbon Container Terminal in Barreiro".

Main points of analysis:

1. The global and national context of container shipping.
2. Reasons for implementing another container terminal in the Port of Lisbon, specifically in Barreiro.
3. Assess the compatibility between the Terminal and the proposed location, through analysis of Territorial Management Instruments, Strategic Plans and other Projects.
4. To ascertain the potential effects/impacts on the territory in question, in the following areas:
 - Environmental
 - Economic
 - Social
 - Urban

Hypothetical scenarios considered:
- Pessimistic, optimistic and invariable.

PROFESSIONAL EXPERIENCE // FUNCTIONS

PESSOAS 2030 // FINANCIAL AND DATA ANALYST IN EU FUNDS

Functions:

- Development of analysis tools to support operations (analytical files built in Excel using VBA language);
- Creation of reports and dashboards in Power BI to determine program indicators;
- Analysis and validation of expenditure;
- Systematic physical and financial verification of reimbursement requests and applications;
- Analysis and preparation of Public Procurement procedures: Public Tenders, Prior Consultations, General and Simplified Direct Adjustments, issuing opinions on financial cuts.

Tools: Excel (VBA) & Power BI (DAX) & Internal Software

jan 2023 - present

COSCO SHIPPING CO // MARITIME EXPORT PROCESS MANAGER

Functions:

- Responsible for monitoring the export process (by ship or rail), from the moment a shipment is booked until the container (goods) arrives at its final destination.
- Analyzing the best transport solutions and assessing multimodal connections;
- Close contact with logistics partners;
- Resolving customs discrepancies with customs;
- Vessel invoicing: assessing quotes and showing expenses on shipments (Storage, Demurrage, VGM weighing).

Tools: Internal Software

aug 2021 - aug 2022

GRUPO ETE // PROJECT MANAGEMENT IN MARITIME SECTOR

Functions:

- Monitoring business start-ups and proposing strategic decisions;
- Offering support to the Group's companies by monitoring and preparing key KPIs for each business;
- Analyzing the viability of new projects that arise in the Group's different areas of activity;
- Promoting corporate relations through internal networking.

Concepts learned:

- In the Group's different areas of activity such as Port Operations, Maritime Transportation, River Transportation, Shipping Agents, Logistics Operations, Engineering and Ship Repair;
- Port concepts, nature of goods (containers, general cargo, bulk cargo), natural and mineral resources.

Examples of projects:

- Production of statistical reports on key performance indicators (KPIs) for different Group companies;
- Preparation of corporate presentations on the Group's activities;
- Proving technical quality and preparing applications for national/international public tenders;
- Setting up business analyses, financial models and navigation models for certain internal projects;
- Market research to find potential clients.

Operational visits to:

- Port terminals (TMPB, Portugal and Santiago, Cape Verde), Naval Rocha shipyard and dry dock, Operations off the Tagus (Clínquer), Project cargo operations on the Tejo river, Logistics warehouses (Lisbon and Cape Verde), Interior of international ships (in port and in shipyard), Navigation on a Cabotage ship (Cape Verde), Visit to Passenger operation ships on the Tagus (Soflusa), Tugs, Barges and Floating cranes.

Tools: Excel & Power BI & Internal Software

oct 2019 - aug 2021
